David Medeiros Forensic Master Report — Public Edition

Over nearly three decades, David Medeiros combined direct disability service, brain-injury self-advocacy, public-records work, state complaints, legislative testimony, federal submissions, and evidence preservation to build an unusually broad individual public record concerning Medicaid ABI Waiver administration and disability rights.

1. What This Record Shows

A two-minute, evidence-controlled overview of the service, petitioning, notice, preservation, and public-education record.

Two-minute overview

ENTRY 1	
Id	overview-001
Statement	The supplied record begins with a dated service foundation in 1998 and later expands into public-records work, state complaints, disability-accommodation requests, legislative filings, federal submissions, evidence preservation, and public education.
ENTRY 2	
Id	overview-002
Statement	The public chronology contains 51 source-linked actions that passed the existing publication control. Eight high-consequence timeline entries remain withheld because the reviewed corpus does not provide the required primary orders or agency letters.
ENTRY 3	
Id	overview-003
Statement	The record proves the existence, sequence, identifiers, and documented notice routes supported by cited sources. It does not turn a submission into receipt, receipt into investigation, or investigation into an official finding.
ENTRY 4	
Id	overview-004
Statement	The primary review path is the three foundational reports, the qualified Public Service and Action Record, and the 14 independently hashed binder parts covering pages 1–5,133.

21. Adversarial Review and Alternative Explanations

Contradictory interpretations, source gaps, and claims excluded from factual publication.

Risk, alternative-explanation, and quarantine register

ENTRY 1	
Id	FMR-RISK-001
Risk	Investigation language
Finding	Several timeline rows say an agency initiated an investigation. A website label or complaint acknowledgment does not prove an investigation.
Required Treatment	Change to submitted, acknowledged, referred, or archive asserts until an agency status letter is attached.
Status	WITHHELD_INSUFFICIENT_EVIDENCE

ENTRY 2	
Id	FMR-RISK-002
Risk	Adverse proceeding entries
Finding	Rendered timeline rows describe an HHS exclusion notice, receivership, court audit, and adverse federal findings involving ABI Resources.
Required Treatment	Quarantine. These entries appear inconsistent with the main record and require primary orders or should be removed.
Status	WITHHELD_INSUFFICIENT_EVIDENCE

ENTRY 3	
Id	FMR-RISK-003
Risk	Date inconsistency
Finding	The federal report is dated September 21, 2024, while the 75 page binder version carries September 24 footer dates.
Required Treatment	Describe as prepared September 21 and distributed or revised by September 24 until sent records resolve the date.
Status	WITHHELD_INSUFFICIENT_EVIDENCE

ENTRY 4	
Id	FMR-RISK-004
Risk	Page count inconsistency
Finding	The 2024 report appears in 50 page and 75 page forms.
Required Treatment	Identify each version by hash, creation date, purpose, and recipient list.
Status	WITHHELD_INSUFFICIENT_EVIDENCE

ENTRY 5	
Id	FMR-RISK-005
Risk	FOIA terminology
Finding	Some source text applies federal FOIA directly to Connecticut agencies.
Required Treatment	Use Connecticut FOIA for Connecticut agencies and 5 U.S.C. section 552 only for federal agencies.
Status	WITHHELD_INSUFFICIENT_EVIDENCE

ENTRY 6	
Id	FMR-RISK-006
Risk	FOIA deadline terminology
Finding	A twenty working day determination rule belongs to federal FOIA. Connecticut records must be provided promptly and Connecticut appeal rules differ.
Required Treatment	Do not apply one deadline to every agency.
Status	WITHHELD_INSUFFICIENT_EVIDENCE

ENTRY 7	
Id	FMR-RISK-007
Risk	Legal conclusions
Finding	Some archive titles state crimes, obstruction, spoliation, fraud, or constitutional violations as settled facts.
Required Treatment	Use concern, allegation, question, or evidence for review unless an official finding or judgment exists.
Status	WITHHELD_INSUFFICIENT_EVIDENCE

ENTRY 8	
Id	FMR-RISK-008
Risk	Causation
Finding	The record contains temporal connections among complaints, referrals, business harm, police contact, and financial loss.
Required Treatment	Temporal sequence is not proof of a common actor or coordinated plan. State only what the records directly connect.

ENTRY 8	
Status	WITHHELD_INSUFFICIENT_EVIDENCE

ENTRY 9	
Id	FMR-RISK-009
Risk	Counts
Finding	Archive totals include interface counts, parsed counts, and repeated source copies.
Required Treatment	Use 272 unique archive records from this audit, 251 displayed as published, and explain the measurement date.
Status	WITHHELD_INSUFFICIENT_EVIDENCE

ENTRY 10	
Id	FMR-RISK-010
Risk	Names and titles
Finding	Roles changed across 2023 through 2026 and some source names may refer to different people with similar names.
Required Treatment	Verify the dated role in the native source. Do not infer current employment.
Status	WITHHELD_INSUFFICIENT_EVIDENCE

ENTRY 11	
Id	FMR-RISK-011
Risk	Privacy
Finding	The binder contains contact information, financial material, and potentially protected health information.
Required Treatment	Keep the master report internal. Redact the public edition and publish only source controlled exhibits.
Status	WITHHELD_INSUFFICIENT_EVIDENCE

Level	Level 3
Type	Public archive assertion
Treatment	A timeline, article, index, or summary created by David Medeiros that points to evidence but is not itself the underlying proof.
Claim Status	PARTIALLY_SUPPORTED

ENTRY 4	
Id	FMR-EV-004
Level	Level 4
Type	Unverified or disputed
Treatment	A statement that needs the native document, has inconsistent dates, asserts an investigation without an agency notice, or conflicts with another record.
Claim Status	WITHHELD_INSUFFICIENT_EVIDENCE

Method rules

ENTRY 1	
Id	method-001
Statement	A submission is described as a submission, not as an investigation.
ENTRY 2	
Id	method-002
Statement	A receipt proves receipt, not agreement with the allegation.
ENTRY 3	
Id	method-003
Statement	A closure proves an agency response, not the truth or falsity of the underlying concern.
ENTRY 4	
Id	method-004
Statement	A public article proves publication, not the accuracy of every statement in the article.
ENTRY 5	
Id	method-005
Statement	A case number is preserved exactly but must be matched to the original acknowledgment before any higher-consequence claim.
ENTRY 6	
Id	method-006
Statement	Names document notice, roles, and communication routes; naming never implies liability.
ENTRY 7	
Id	method-007
Statement	Private medical details, private contact information, and participant information are not reproduced.

23. Limitations

What this public edition cannot establish from the supplied corpus.

Publication limitations

ENTRY 1	
Id	limitation-001
Statement	Complete means complete for the supplied and verified controlled source corpus, not every lifetime action or every record ever created.
ENTRY 2	
Id	limitation-002
Statement	The corpus does not contain a complete 1998–2017 service ledger, every native sent message or acknowledgment, every hearing time code, every participant story, or every official export.
ENTRY 3	
Id	limitation-003
Statement	Integrity checks show byte identity against a recorded digest; they do not prove authorship, truth, authenticity, legality, or an official finding.
ENTRY 4	
Id	limitation-004
Statement	Eight high-consequence timeline entries are withheld pending primary agency records or orders.
ENTRY 5	
Id	limitation-005
Statement	Automated extraction identifiers and binder subjects remain OCR-uncertain until source context is confirmed.
ENTRY 6	
Id	limitation-006
Statement	The HTML edition is the primary accessible version. The downloadable PDF and DOCX identify their tested scope and do not claim PDF/UA or complete WCAG certification.

24. References
