

Conduct an Independent Audit:

Hire an independent entity to conduct a thorough review of the Medicaid referral processes within the ABI Waiver Program to identify any biases or unfair practices.

The audit should also evaluate the performance and quality of services provided by ABI Resources and other service providers to ensure that referrals are based on merit and the ability to meet the needs of individuals with acquired brain injuries.

Implement a Fair and Equitable Referral System:

Develop a standardized and objective referral system that ensures all service providers are evaluated based on the same criteria.

Consider incorporating a randomized component to the referral process to prevent bias and ensure a fair distribution of referrals.

Engage Stakeholders:

Create a platform for open dialogue between Medicaid officials, service providers, individuals with acquired brain injuries, and their families to discuss concerns related to the referral process.

Use feedback from stakeholders to continuously improve the referral system and address any emerging issues.

Provide Training and Education:

Offer training to Medicaid officials and other stakeholders involved in the referral process to raise awareness about potential biases and the importance of a fair and equitable system.

Educate service providers about the referral process, criteria for referrals, and steps they can take if they believe they have been treated unfairly.
