**Subject: Urgent Request for Advocacy and Action on Systemic Rights
Violations in Connecticut's Disability Support System**

Dear Congressman John B. Larson,

I am writing to you in my capacity as the CEO and Director of ABI Resources, a Connecticut-based organization dedicated to supporting individuals with disabilities under the Federally Funded Medicaid ABI Waiver Program. I am reaching out to you, as a respected representative of Connecticut's 1st Congressional District, to seek your support and intervention in addressing critical systemic rights violations within our state.

Our organization, and more importantly, the community we serve, are facing significant challenges due to rights infringements perpetrated by state authorities. These issues are compounded by the lack of adequate federal oversight, severely impacting not only my rights as a disabled business owner but also those of the vulnerable individuals we support. The complexity, costs, and prolonged procedural delays inherent in the current systems represent significant barriers to justice and equitable treatment.

Enclosed with this letter is a comprehensive report that details these violations, our efforts to address them, and the inadequate responses we have received from both state and federal entities. The situation directly contradicts the principles of justice and equity and violates laws enacted to protect the rights of disabled individuals.

I respectfully request your immediate attention to this matter. While these issues might appear as state-level administrative challenges, they are indicative of a more profound systemic failure that requires attention and intervention at the federal level.

The evidence we have compiled indicates a pattern of neglect and systemic issues that necessitate your direct and immediate intervention. The values of justice, equity, and equitable treatment under the law, foundational to our society, are currently at risk. The future well-being of individuals supported by ABI Resources, and the integrity of our commitment to disabled citizens, now rests in part on the actions taken at the federal level.

While the immediate concerns originate from the Connecticut government, the broader failure at the federal level has allowed these issues to persist. This situation is not only a Connecticut issue but is fundamentally a federal concern, highlighting failures in the United States' ability to effectively oversee, regulate, and intervene as necessary.

This situation calls for more than acknowledgment; it requires immediate and decisive action. The welfare of numerous individuals with disabilities, who depend on services like those provided by ABI Resources, is in jeopardy.

This urgent appeal underscores the lack of transparency and accountability in Connecticut's administration of the Medicaid ABI Waiver Program. Our report illuminates potential civil rights violations, government overreach, and their profound impact on the disabled community. Documented concerns include potential corruption, ethical violations, and financial mismanagement within state-run programs.

The absence of decisive action against these allegations may set a troubling precedent, undermining the principles of governance and oversight. The issues raised involve potential discrimination and inequality against individuals with disabilities and also raise significant public safety concerns.

As a leader deeply involved in these matters, I have witnessed the detrimental effects these systemic issues have on our clients and their families. This is not just a policy failure; it is a failure to protect and support those who rely on us. Robust oversight and effective solutions are urgently needed, and your support is critical in this endeavor.

In conclusion, the situation we are facing is a national concern, necessitating proactive and decisive intervention at both state and federal levels. The well-being of countless individuals reliant on the integrity of our systems hangs in the balance.

I implore you to recognize the gravity of this situation and take appropriate action. It is vital that the United States, and particularly our representatives in Congress, take responsibility for these systemic failures and work towards implementing effective solutions.

Thank you for your consideration of this pressing issue. I am ready to provide any further information or assistance required and look forward to your prompt and supportive response.

Best regards,
David Medeiros
